2019 Rule(s) Bulletin

Bulletin: 2019 – April 10, 2019

Fuel Cell Protection Plate.

After some early season safety checks with Pro Stocks it has been decided to include a fuel cell protection plate.

- A. The plate must be made of magnetic steel, minimum of 1/8" (.125) and must be equal size or more of the fuel cell.
- B. Plate is to be welded to the framing.
- C. Plate will also have a 3/8" hole drilled in one of the corners for inspection of thickness.

The mandating of the protection plate will be May 1st at DIRTcar Sanctioned tracks and all Series Races.
