2019 Rule(s) Bulletin

Bulletin: 2019 – May 8, 2019

Pro Stock Fire Suppression Mounting Instructions.

With feedback from teams and chassis builders it was been decided to expand on the location for the Fire Suppression System.

- A. Fire Bottles can be mounted behind the seat area, centered in chassis and should be below deck.
- B. Fire Bottles can be mounted inside the cockpit area, on passenger side of the driveshaft and must be easily visible.

Please note – With supply and shipping delays Pro Stock weight until June 15 will be 3000 lbs. After June 15 without Fire Suppression there will be 50 lbs. added.
